SUMMARY

AI App Engineer with 14+ years of software delivery experience, comfortable working forward deployed with client teams from scoping to production, focused on building production AI agents, RAG systems, and workflow automation for healthcare, sales, and operations. Delivered 100+ projects with strong execution quality and business-aligned outcomes.

CORE SKILLS

OpenAI, LangChain, RAG Pipelines, Prompt Engineering, LLM Evaluation, Python, Node.js, Django, FastAPI, REST APIs, Supabase, AWS, Workflow Automation, Human-in-the-loop QA, Vector Search, Retrieval Systems, Data Analytics

EXPERIENCE

AI/ML Engineer — Behavioral Authentication System (Freelance) 2026 - Present

- Built a phone-sensor behavioral authentication proof of concept using accelerometer, gyroscope, and touch-rhythm signals with on-device machine learning (NumPy, scikit-learn) for continuous, privacy-preserving identity verification.
- Designed a security-first decision state machine for owner, non-owner, and device-handoff detection, and ran a signal feasibility study across sessions and days.

Full-Stack Developer — Referral & Rewards Platform (Freelance) 2026 - Present

- Developed a referral and rewards platform with a React frontend and Django backend — referral tracking, onboarding flows, and REST API integration.

Software Developer, Dis-connect

Nov 2024 - Present

- Building and extending PHP Yii2 applications with AI OpenVision features for image and vision-backed workflows.
- Implemented backend improvements and integrations to stabilize production behavior and release quality.

Full Stack Software Engineer, Crowdbotics

2019 - 2025

- Contributed to multiple AI and product engineering projects using React Native, Django, Node.js, React, and MongoDB.
- Collaborated on architecture and delivery cycles for production-grade platforms.

Data Scientist & AI Consultant

2019 - Present

- Delivered OpenCV, TensorFlow, and scikit-learn based solutions for classification, vision intelligence, and decision support.
- Built automation use cases integrating cloud AI services such as AWS Rekognition and AWS Polly.

SELECTED AI PROJECTS

- AI Lead Generation System for Local Service Businesses
- AI Lead Scoring and Qualification for Better Sales Targeting
- AI Receptionist for Appointment Booking
- Telehealth Supervisor Copilot
- Community Clinic Intake Automation

EDUCATION

- MPhil in Computer Science (Machine Learning, Data Science), 2019 - 2021
- MS in Computer Science (Intelligent Systems), 2017 - 2018
- BS in Software Engineering, 2012 - 2015
