SKILLS

Machine Learning

PyTorch · TensorFlow · Hugging Face
scikit-learn · YOLO · OpenCV
Diffusion · LoRA · ComfyUI
OCR: Tesseract, Cloud Vision

AI / LLM

OpenAI · Claude · Gemini
LangChain · LangGraph · LlamaIndex
MCP · RAG · pgvector · Pinecone

Data

PostgreSQL · Redshift · EMR
Spark · pandas · NumPy
ETL & analytics pipelines

Backend

Python · FastAPI · Django/DRF
Flask · Node.js · PHP/Laravel
PostgreSQL · MongoDB · Supabase

Cloud & DevOps

AWS: Lambda, EC2, S3, DynamoDB
API Gateway · Cognito · ECS/EKS
Azure · Firebase · Docker · CI/CD

Frontend / Mobile

React · Next.js · TypeScript
Vue · Angular
React Native · Expo · Flutter

EDUCATION

PhD Computer Science

University of Karachi · in progress

MPhil Computer Science

University of Karachi · 2019-2021

MS Computer Science

IBA Karachi · 2017-2018

BS Software Engineering

University of Karachi · 2012-2015

CERTIFICATIONS

Backend Development

Upwork Skill Certification

Python Development

Upwork Skill Certification

Shabeeb Hasan

Data Scientist & ML Engineer

Applied machine learning, computer vision and analytics

Data scientist with an engineering spine: 12+ years shipping software, plus an MPhil whose research applied probabilistic machine learning to detecting depression and anxiety from facial expressions. I build models that survive production, computer vision and OCR pipelines, and analytics that answers the question the business actually asked.

12+ years experience	133 projects delivered	71% repeat clients	106 five-star reviews	5.0 average rating
--------------------------------	----------------------------------	------------------------------	---------------------------------	------------------------------

EXPERIENCE

Artificial Intelligence Researcher, Regex.

2026-present

- Applied AI research: model evaluation, probabilistic methods and validation that holds up outside a demo.

Independent Software Engineer & Consultant

2015-present

- 133 completed projects for clients in the US, EU, Australia and the Gulf; 106 five-star reviews, 5.0 average rating.
- 71% of engagements from repeat clients. One platform company hired me 21 times, another 20, between 2017 and 2025.
- Delivery spans AI apps, RAG systems, AI agents, SaaS platforms, computer vision, cloud pipelines and mobile.
- Open source and public work: 60 repositories, including a self-hosted coding LLM server, AR experiments with React Native and Viro, and the portfolio site itself.

Founder / Software Engineer, BayDot (baydot.net)

2016-present

- AI agents, voice AI and full-stack automation studio; scopes automation ROI-first and ships production systems.
- Own products shipped: Ishara (live PSX tracker, FastAPI, 345 tests), MediShare (Expo + Supabase with row-level security), Clip Studio (on-device video) and VoiceRelay (C++ audio engine on Android).

Software Developer, Dis-Connect (Germany)

2024-2026

- PHP (Yii2) with SAP integration for German enterprise clients, plus AI work: a facial emotion detection app on Expo (React Native) and LoRA training pipelines on FastAPI, Celery and Docker.

Software Developer, Synapse Consulting

2014-2016

- Web, mobile and desktop delivery for agency clients: iOS and Android apps, AngularJS and Node.js web apps, PHP and .NET backends, and desktop applications, including an audio and video editing app and a PDF drawing and editing tool.

SELECTED PROJECTS

AI & Machine Learning

Document Extraction Backends, Google Vision and Document AI form processing for a document scanning app (two contracts), and passport, licence and card OCR behind a React Native app.

FaceSearch — Face Search and AI Image Platform (Baydot product), Docker-first SaaS: React and Vite front end, Django API, Celery workers. Face search over a photo base, diffusion image and video generation, garment try-on and LoRA training with ComfyUI workflows (ControlNet, FaceID, SDXL), with a commercial-licence check on every model used.

Self-Hosted Coding LLM Server (open source), vLLM serving an open-weight coding model on two T4 GPUs behind an OpenAI-compatible API and a tunnel, so any editor or agent can point at it. Published on GitHub.

Behavioural AI Authentication Runtime, Phone-sensor continuous authentication for a client (FastAPI, scikit-learn): Phase 1 runtime plus a Phase 2 measurement study across sessions and days, reported with its limits rather than marketed.

Ethos Guard — Speech and Tone Analytics (PhD research), Advisory analysis that combines what was said, how it was said and facial cues into one report, with the uncertainty stated rather than hidden.

Depression & Anxiety Detector (MPhil research), Probabilistic ML on facial expressions for telehealth screening, from the MPhil research.
