SKILLS

AI / LLM

OpenAI · Claude · Gemini
LangChain · LangGraph · LlamaIndex
MCP · RAG · pgvector · Pinecone

Machine Learning

PyTorch · TensorFlow · Hugging Face
scikit-learn · YOLO · OpenCV
Diffusion · LoRA · ComfyUI
OCR: Tesseract, Cloud Vision

Backend

Python · FastAPI · Django/DRF
Flask · Node.js · PHP/Laravel
PostgreSQL · MongoDB · Supabase

Cloud & DevOps

AWS: Lambda, EC2, S3, DynamoDB
API Gateway · Cognito · ECS/EKS
Azure · Firebase · Docker · CI/CD

Frontend / Mobile

React · Next.js · TypeScript
Vue · Angular
React Native · Expo · Flutter

Automation

n8n · Make · Zapier
Stripe · Voice AI · Agents

EDUCATION

PhD Computer Science

University of Karachi · in progress

MPhil Computer Science

University of Karachi · 2019-2021

MS Computer Science

IBA Karachi · 2017-2018

BS Software Engineering

University of Karachi · 2012-2015

CERTIFICATIONS

Backend Development

Upwork Skill Certification

Python Development

Upwork Skill Certification

Shabeeb Hasan

AI Application Engineer

LLM apps, RAG, AI agents and forward-deployed delivery

AI engineer with 12+ years of software delivery, working forward deployed with client teams from scoping to production. I build LLM applications, RAG systems over real business documents and agent workflows with human approval gates, then validate them honestly. An MPhil in probabilistic machine learning keeps the focus on accuracy and real-world reliability rather than demo results.

12+ years experience	133 projects delivered	71% repeat clients	106 five-star reviews	5.0 average rating
--------------------------------	----------------------------------	------------------------------	---------------------------------	------------------------------

EXPERIENCE

Artificial Intelligence Researcher, Regex.

2026-present

- Applied AI research: model evaluation, probabilistic methods and validation that holds up outside a demo.

Independent Software Engineer & Consultant

2015-present

- 133 completed projects for clients in the US, EU, Australia and the Gulf; 106 five-star reviews, 5.0 average rating.
- 71% of engagements from repeat clients. One platform company hired me 21 times, another 20, between 2017 and 2025.
- Delivery spans AI apps, RAG systems, AI agents, SaaS platforms, computer vision, cloud pipelines and mobile.
- Open source and public work: 60 repositories, including a self-hosted coding LLM server, AR experiments with React Native and Viro, and the portfolio site itself.

Founder / Software Engineer, BayDot (baydot.net)

2016-present

- AI agents, voice AI and full-stack automation studio; scopes automation ROI-first and ships production systems.
- Own products shipped: Ishara (live PSX tracker, FastAPI, 345 tests), MediShare (Expo + Supabase with row-level security), Clip Studio (on-device video) and VoiceRelay (C++ audio engine on Android).

Software Developer, Dis-Connect (Germany)

2024-2026

- PHP (Yii2) with SAP integration for German enterprise clients, plus AI work: a facial emotion detection app on Expo (React Native) and LoRA training pipelines on FastAPI, Celery and Docker.

Software Developer, Synapse Consulting

2014-2016

- Web, mobile and desktop delivery for agency clients: iOS and Android apps, AngularJS and Node.js web apps, PHP and .NET backends, and desktop applications, including an audio and video editing app and a PDF drawing and editing tool.

SELECTED PROJECTS

AI & Machine Learning

AI Job Monitoring Platform (MCP, own tooling), Agent tooling on MCP servers: scheduled monitoring, structured extraction, auto-drafting and human-approval gates.

Self-Hosted Coding LLM Server (open source), vLLM serving an open-weight coding model on two T4 GPUs behind an OpenAI-compatible API and a tunnel, so any editor or agent can point at it. Published on GitHub.

GPT-3 Question Answering over Client Documents, Embeddings-based retrieval and answering over a client's own text corpus (2023), plus LLM data-transformation microservices for another client.

SaaS & Platforms

Job and Lead Engine SaaS (Baydot product), Next.js App Router and TypeScript on Supabase with Auth and row-level security: job aggregation, AI lead scoring, usage metering and paid plans, and a human approval gate before anything is sent.
