SELECTED PROJECTS

SaaS & Platforms

21 Contracts for One Platform Company, Backend (Django/DRF) and frontend (React) product builds on a shared platform, 2019-2025; the same client hired me 21 times.

Job and Lead Engine SaaS (Baydot product), Next.js App Router and TypeScript on Supabase with Auth and row-level security: job aggregation, AI lead scoring, usage metering and paid plans, and a human approval gate before anything is sent.

Portfolio Ledger: One Accounting Core, Three ERPs, An investment ledger with decimal accounting in a framework-free package, an Odoo 18 addon, and adapters posting the same balanced journal entries into Zoho Books and SAP Business One. 69 core tests plus 12 inside a real Odoo database.

Zoho and AWS Lambda Stack Ported to Odoo 17 (2026), Seven Lambdas, two Deluge scripts and a 2.9 GB CSV directory pipeline rebuilt as one Odoo module: subscription lifecycle, Mailchimp lead sync, a fixed-width eligibility export and the provider directory as searchable records. Nine defects found in the original, including a typo that had silently broken renewals.

Ishara — Live PSX Portfolio Tracker (Baydot product), FastAPI, SQLite and a scheduler pricing holdings every 60 seconds, with RSI notices to phones. The rule was backtested on five years of 39 stocks before any alert shipped, and the result, that it did not beat holding, is published in the product. 345 automated tests.
