Forward Deployed Engineer

Embedded with customers, from discovery to production

Forward deployed engineer with 12+ years working directly alongside customer teams. I sit in the customer's workflow, find where their process actually breaks, then build and ship the integration, AI system or internal tool that fixes it. 133 client engagements, 71% of them repeat business, which is the honest measure of whether the deployment stuck.

12+ years experience	133 projects delivered	71% repeat clients	106 five-star reviews	5.0 average rating

SELECTED PROJECTS

SaaS & Platforms

Portfolio Ledger: One Accounting Core, Three ERPs, An investment ledger with decimal accounting in a framework-free package, an Odoo 18 addon, and adapters posting the same balanced journal entries into Zoho Books and SAP Business One. 69 core tests plus 12 inside a real Odoo database.

Zoho and AWS Lambda Stack Ported to Odoo 17 (2026), Seven Lambdas, two Deluge scripts and a 2.9 GB CSV directory pipeline rebuilt as one Odoo module: subscription lifecycle, Mailchimp lead sync, a fixed-width eligibility export and the provider directory as searchable records. Nine defects found in the original, including a typo that had silently broken renewals.

Job and Lead Engine SaaS (Baydot product), Next.js App Router and TypeScript on Supabase with Auth and row-level security: job aggregation, AI lead scoring, usage metering and paid plans, and a human approval gate before anything is sent.

AI & Machine Learning

AI Job Monitoring Platform (MCP, own tooling), Agent tooling on MCP servers: scheduled monitoring, structured extraction, auto-drafting and human-approval gates.
