Applied AI engineer building document question answering, data-ingestion services and LLM features in existing applications. Combines Python backend delivery with an MPhil in probabilistic machine learning and a focus on testable, evidence-grounded output.

TECHNICAL SKILLS

Python | FastAPI | OpenAI embeddings | RAG | Document processing | PostgreSQL | Supabase | Docker | GCP | API testing

SELECTED PROJECTS

Question answering over private documents | Client proof of concept

Built chunking, OpenAI embeddings, similarity retrieval and answers grounded in retrieved passages for a client document corpus in 2023. Project evidence

LLM import and inference services | Client work

Built Python data import, transformation and inference microservices with unit, integration and component testing, Docker and GCP managed services. Project evidence

Claims data upload and AI query prototype | Paid client evaluation

Delivered a Next.js/TypeScript and Supabase prototype with data upload, natural-language analysis, local setup instructions and query examples. Client under NDA. Project evidence

Document extraction backends | Client work

Built Google Vision and Document AI form-processing backends for a scanning app, plus passport, licence and card OCR for mobile workflows. Project evidence
