SELECTED PROJECTS

SaaS & Platforms

Franco-fun Referral Rewards (live), Built solo end to end: React 18 + TypeScript, Django 5/DRF, PostgreSQL, Stripe, deployed and maintained.

MediShare — Medicine Donation App (Baydot product), Expo and React Native on Supabase with row-level security on addresses and handover codes, bilingual, iOS, Android and web from one codebase.

Ishara — Live PSX Portfolio Tracker (Baydot product), FastAPI, SQLite and a scheduler pricing holdings every 60 seconds, with RSI notices to phones. The rule was backtested on five years of 39 stocks before any alert shipped, and the result, that it did not beat holding, is published in the product. 345 automated tests.

Cloud, Mobile & Automation

Casana App, React Native app on a serverless Django + AWS Lambda backend with Stripe payments.

Stripe & MailerLite Automation Stabilisation, Audit first, then fix: a subscription business's Stripe and MailerLite automations repaired in two milestones (2026).

Roam Reality — AR Travel App (live, iOS & Android), Built the whole mobile app: Mapbox maps, AR views and offline handling, plus a Django admin where the client draws and selects regions on a map. Live on both stores since January 2025.
