Forward Deployed Engineer

Embedded with customers, from discovery to production

Forward deployed engineer with 12+ years working directly alongside customer teams. I sit in the customer's workflow, find where their process actually breaks, then build and ship the integration, AI system or internal tool that fixes it. 133 client engagements, 71% of them repeat business, which is the honest measure of whether the deployment stuck.

12+ years experience	133 projects delivered	71% repeat clients	106 five-star reviews	5.0 average rating

SELECTED PROJECTS

AI & Machine Learning

AI Job Monitoring Platform (MCP, own tooling), Agent tooling on MCP servers: scheduled monitoring, structured extraction, auto-drafting and human-approval gates.

GPT-3 Question Answering over Client Documents, Embeddings-based retrieval and answering over a client's own text corpus (2023), plus LLM data-transformation microservices for another client.
