AI Application Engineer

LLM apps, RAG, AI agents and forward-deployed delivery

AI engineer with 14+ years of software delivery, working forward deployed with client teams from scoping to production. I build LLM applications, RAG systems over real business documents and agent workflows with human approval gates, then validate them honestly. An MPhil in probabilistic machine learning keeps the focus on accuracy and real-world reliability rather than demo results.

SELECTED PROJECTS

AI & Machine Learning

AI Job Monitoring Platform (MCP), Agent tooling on MCP servers: scheduled monitoring, structured extraction, auto-drafting and human-approval gates.

SupaQuery: Natural-Language SQL, Supabase + Next.js + LLM for plain-English queries over large datasets.

Smart Support Agent (RAG), LangChain support agent grounded in client knowledge bases, answering from real documents rather than guesses.

Behavioural AI Authentication Runtime, Phone-sensor continuous authentication (FastAPI + One-Class SVM); zero incorrect recoveries in final validation.

SaaS & Platforms

Franco-fun Referral Rewards (live), Built solo end to end: React 18 + TypeScript, Django 5/DRF, PostgreSQL, Stripe, deployed and maintained.

Django at Scale: 21 contracts, one client, Parallel Django/DRF product builds on shared platform standards, 2019-2025.

Laravel Platform on AWS: 3-year engagement, Production ownership 2018-2021, doctor-patient app backend, PHP + SAP integration for Dis-Connect.

AI Lead Generation SaaS, Multi-tenant dashboard with role-based access and AI-driven lead workflows.
